

Fix $\Sigma \subseteq E \neq$

$\alpha, \beta, \gamma \in E$, a.t.

$\Sigma \cup E \alpha, \beta, \gamma \rightarrow \delta$

Lemma: $\Sigma \cup E \alpha, \beta, \gamma \rightarrow \delta$
is consistent. ① -
② -

Proof:

① $\Sigma \cup E \alpha, \beta, \gamma \rightarrow \delta$
 $\Sigma \cup E \alpha, \beta, \gamma \rightarrow \delta$

$\sum_{i=1}^n \alpha_i \beta_i \gamma_i \delta_i \epsilon_i$

①
